PLANT NUMBER		PILLAR BODY & ARM	
PLANT NUMBER		TRIPOD	

THESE INSTRUCTIONS SHOULD BE FOLLOWED WHEN CHECKING EQUIPMENT

- Check the general appearance of the Alsipercha Tripod system. (pillar and arm)
- Check the paint finish on the Alsipercha Tripod system. Check condition of bodywork paying attention to pitting corrosion on the whole system. Check the Alsipercha Tripod for any damage, distortion, cracks or any security concern.
- Check weld condition on the whole system paying attention to the arm, anchorage point and clamp. Check corner welds also.
- Check lugs present on the Alsipercha Tripod for any cracks, distortion, and damage or security concern.
- Make sure the locking safety chain and clip is present on main pillar and check condition.
- Make sure that 3 wired secured locking pins & R-clips are in place in each tripod leg to secure base.
- Check every flexible corner and make sure bolts & nuts are present tightened and secured on all part of the Alsipercha Tripod system.
- Make sure the metal hook stick which is the component used to bring the fall arrest system closer to the worker when changing the anchorage is present and in good condition.
- Use MG2 for Harness & Lanyard check sheet. If fitted, check the condition of protective covering (bell housing) for damage.
- Make sure Marwood Logo, Plant Return Label MGS24 and MGS71 Next Examination due date are present.
- Check and record the plant number is present on the Alsipercha Tripod system. Check the condition of the CE plate which might be riveted on the main pillar.

Equipment which displays evidence of incorrect operation or damage should be withdrawn from service and returned to workshops.

	O K	R	COMMENTS
