Serial No: Contract number and Customer Name:			
New: Pre Hire: Thorough Examination :	Off Hire Test:		
Examination area/ Instructions	Comments/Measurements	Pass	Fail
Check the general overall condition and appearance of the skip including paint finish and signage.			
Inspect main circular body structure for impact damage and distortion which may affect operation.			
Inspect the inside and bottom of the skip for any damage, distortion, residue, mud or concrete. For larger skip, an access-step (small ladder) properly secured can be used for safe and secure inspection by a competent person.			
Check generally for cracked welds all round the skip paying special attention bale fittings. Check the locking plate mechanism on both side making sure there are no debris and damage.			
Check that the lifting bale is straight, secure and undamaged. Check lifting bale pins are in place and functioning including securing bolt. Check that the trunion pins and plates on both sides are not worn, distorted or have any security concern			
Check and ensure security chain c/w R-clip is present on one side and in good condition, welded properly to the structure, making sure that the chains and fittings are not distorted and corroded.			
Ensure all stickers such as Marwood Logo, MGS82, Next Examination Due Date (MGS71), sticker MGS24 Plant returned label, sticker MGS64 Crane skip data label, Crush Zone (MGS80) and Do Not Walk Under Suspended Load (MGS79) are present.			
Check and record plant number and serial number on top of form
