PLANT NUMBER		DESCRIPTION
--------------	--	-------------

THESE INSTRUCTIONS SHOULD BE FOLLOWED WHEN CHECKING THE EQUIPMENT

- Check main body including handle for security, damage, wear, twisting or distortion.
- Check also the paint finish on body.
- Check for heavy corrosion on body.
- Check the condition of welds.
- Check all pivot points are free to move.
- Check pin apertures in the pin pulling block for burring or excess wear.
- Check that the foot plate is not bend or distorted.
- Check plant number marked.

Note! There may some variance in the precise details listed depending on the equipment being checked. Please use blank spaces if necessary.

Equipment which displays evidence of incorrect operation should be withdrawn from service.
