| 830 | 300 | 90 | 8.8 |

Installation guide

1. Appropriate PPE must be used as per the site specific risk assessment before laying the hose ramps.
2. The hose ramp must be only used and positioned as shown in the photo above.
3. Two hose ramps or more can be joined together by means of dog bones supplied. Make sure the dog bones are secured into the hose ramp slots.
4. As per Red Book (Safety at Street Works Act), a Safety warning 'ramp' sign must be used as hose ramp exceeds 15mm in height.
