

SPEC SHEET

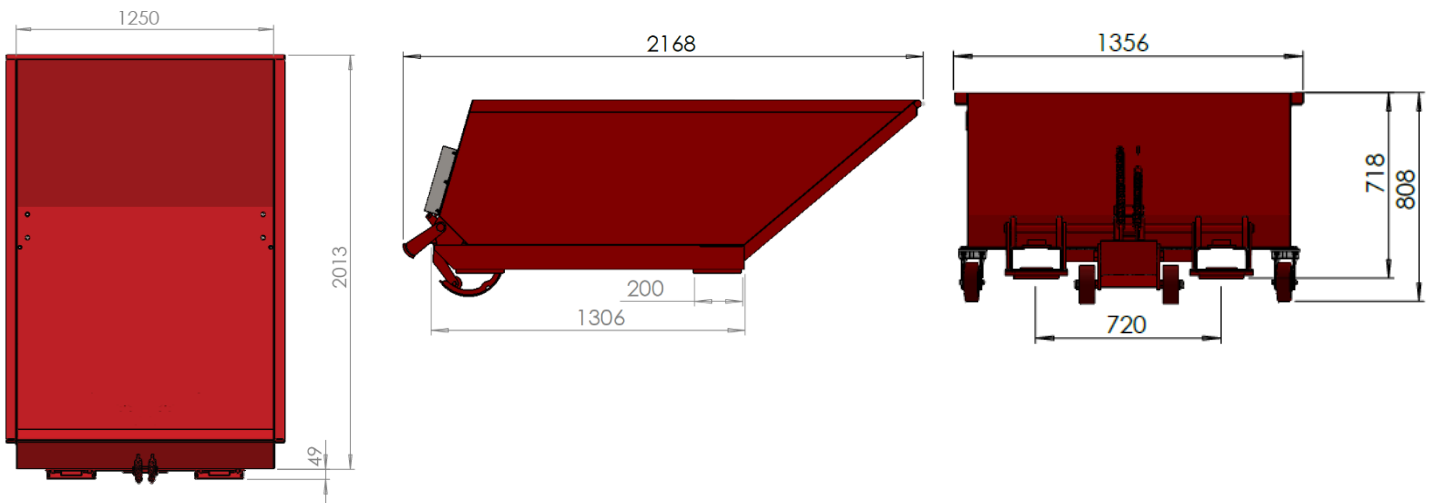

Telehandler Skip

The telehandler skip is the ideal solution when moving waste around site or factory.

The telehandler skip has the following features: -

- Automatically lock/unlocks from behind the fork heels
- Spring guard fitted (All will have after gone through workshop)
- No safety retaining chain required
- Driver ALWAYS in the safety of the cab
- Controlled tipping from within the cab
- No hydraulic hoses to attach
- Available with castors upon request. (Castors to be fitted at mwg workshops)
- Suitable for forks maximum 60mm.

Specifications

Size (L)	Length (mm)	Width (mm)	Height (mm)	Fork channel box Internal (mm)	Self-Weight (kg)
1200	2168	1356	718 (Without castors)	190 x 75	290 (Without castors)

SWL of the skip depends on the configuration of the lifting machine (telehandler)
Add approx. 30kg to get weight with castors

Marwood Note!

Customers should ensure they carry out a site-specific assessment of the risks and put in safe system of works for the operation of the skip
